3 Read the text. Answer the questions.

___ / 2

Many sea animals are in danger of extinction. People throw chemical waste and sewage into the ocean. The chemical waste and sewage kills fish. Many other sea animals are in danger of extinction, too. People are destroying their habitat. Scientists started the World Wildlife Fund in 1961. They wanted to help animals in danger.

- 1** Why are small fish in the ocean dying?
Because people throw chemical waste and sewage into the ocean.
- 2** Why are other sea animals in danger of extinction?
_____.
- 3** Why was the World Wildlife Fund started?
_____.

Total: ___ / 10
